

Seth Fannin

AI SYSTEMS BUILDER | AUTOMATION ARCHITECT | PRODUCT OPERATOR

915-227-2054 ◇ seth0526@gmail.com ◇ El Paso, TX ◇ Open to Remote ◇ Open to Hybrid ◇ Open to Travel ◇ [LinkedIn](#) ◇ [GitHub](#)

SUMMARY

High-agency systems builder with 15+ years of experience operating across enterprise technology, defense, SaaS operations, automation architecture, and AI-enabled workflow design.

Known for entering ambiguous environments, reverse-engineering undocumented processes, and transforming operational complexity into scalable systems.

Built and managed enterprise programs exceeding \$50M, delivered Salesforce automation reducing proposal cycle times by 70%, modernized reporting architectures across Fortune 500 environments, and recently designed AI-powered operational systems leveraging Python, OpenAI APIs, Cursor, Claude, Databricks, and modern agent workflows.

Bridges technical execution and business outcomes across:

- AI Systems & Agent Workflows
- Automation Architecture
- Product Operations
- Enterprise Data Systems
- Operational Intelligence
- Cross-Functional Leadership

I thrive in startup and high-growth environments where ownership, speed, experimentation, and systems thinking matter more than rigid job descriptions.

EXPERIENCE

Business Systems Analyst /Product Operations (Contract)

Nov '25 — Present

ADP (ATP Staffing)

El Paso, TX (Hybrid)

Embedded within ADP's Unemployment Claims organization, supporting enterprise reporting modernization, operational automation, product enablement, and data architecture initiatives.

- **AI, Automation & Operational Systems**
 - Partnered with engineering and product teams to modernize operational workflows supporting thousands of employer compliance transactions.
 - Led requirements discovery and process analysis for State Unemployment Insurance automation initiatives designed to reduce manual processing and improve scalability.
 - Identified automation opportunities across reporting, service operations, workflow routing, and operational governance processes.
 - Translated tribal knowledge and undocumented procedures into reusable operational systems and process frameworks.
- **Data Architecture & Product Intelligence**
 - Led architecture analysis for enterprise Power BI modernization efforts spanning semantic models, PostgreSQL environments, operational reporting layers, and adoption analytics.
 - Performed cross-system reconciliation across Oracle, Databricks, PostgreSQL, Power BI, enterprise reporting environments, and operational data sources.
 - Reverse-engineered reporting logic and business definitions across fragmented systems to establish scalable reporting foundations.
 - Conducted lifecycle modeling, product adoption analysis, coaching utilization analysis, revenue reporting validation, and operational segmentation initiatives.
- **Strategic Impact**
 - Influenced reporting architecture decisions affecting leadership visibility into adoption, coaching engagement, operational utilization, and product performance.
 - Introduced systems-thinking approaches to operational reporting, moving discussions from dashboards toward scalable architecture and data governance.
 - Frequently operated beyond traditional BSA responsibilities by bridging data, operations, reporting, product, and automation domains.

Project Manager & Salesforce Developer

Jun '21 — Jul '25

LEIDOS

El Paso, TX (Remote)

Supported Navy enterprise modernization initiatives within highly regulated Department of Defense environments.

- Managed large-scale modernization programs supporting Navy operational readiness.

- Built Salesforce automation solutions reducing proposal development cycle times by approximately 70%.
- Designed workflows spanning development, QA, user acceptance testing, and production deployment environments.
- Developed executive reporting and operational visibility solutions supporting program leadership.
- Served as a bridge between engineering, compliance, operations, and executive stakeholders.
- Frequently identified automation opportunities and process improvements across enterprise operations.

Procurement Project Manager

Mar '18 — Feb '21

PERSPECTA

El Paso, TX (Remote)

- Managed 20–30 concurrent enterprise procurement initiatives supporting Navy modernization programs.
- Supported operational oversight of more than \$20M in procurement activity.
- Improved reporting visibility and stakeholder alignment through dashboard and reporting modernization efforts.
- Coordinated across technical, operational, and vendor organizations.

Management Analyst III / Data Manager

Nov '16 — Mar '18

AUGUSTINE CONSULTING

Fort Bliss, TX

- Managed operational reporting, workflow systems, knowledge management processes, and data governance activities.
- Built reporting frameworks supporting executive decision-making.
- Supported enterprise operational data management initiatives.

Logistics Analyst

Aug '12 — Jul '16

SAIC

Fort Bliss, TX

- Supported Army logistics and operational readiness initiatives, developing the systems-thinking foundation later applied to enterprise technology, automation, and operational optimization.

Motor Transport Operator

Jan '08 — Jun '12

U.S. Army

Fort Bliss, TX & South Korea

- Honorable service supporting mission-critical transportation and logistics operations, building a foundation in leadership, adaptability, operational execution, and complex problem-solving under pressure.

PROJECTS

AI Voice/Text → Execution Planning Engine

Present

- Designed and developed a Python-based AI operational planning system, converting unstructured voice notes and text into structured execution plans.
 - Integrated OpenAI APIs and Whisper speech-to-text.
 - Implemented dual-input architecture supporting voice and text ingestion.
 - Built automated task extraction and prioritization workflows.
 - Designed local persistence architecture using Markdown knowledge storage.
 - Created foundation for future Telegram, n8n, and agent orchestration integrations.
- **Outcome:** Created a reusable AI workflow transforming messy human inputs into structured execution frameworks suitable for agent-based automation.

AI Research & RevOps Intelligence System

Present

- Built AI-assisted operational research workflows designed to accelerate business analysis and decision support.
 - Automated information synthesis.
 - Reduced manual research effort.
 - Leveraged LLM-assisted workflow design.
 - Structured outputs for operational decision making.

Agent Workflow Architecture Lab

Present

- Designed and tested agent-based operational systems using:
 - Cursor
 - Claude
 - OpenAI APIs
 - Python
 - n8n
- Focused on orchestration patterns, workflow automation, structured outputs, memory systems, and operational agent design.

EDUCATION

Bachelor of Science in Business Administration & Supply Chain, Park University

'13 — '15

CERTIFICATIONS

Active Secret Clearance , Department of Defense

TECHNICAL SKILLS

AI & Automation Python, OpenAI API, Claude, Cursor, AI Agents, Agent Workflows, Prompt Engineering, AI Orchestration, Workflow Automation, n8n, Human-in-the-Loop Systems, LLM Applications, AI-Assisted Development

Product & Systems Product Operations, Systems Architecture, Service Design, Requirements Analysis, Process Design, Operational Intelligence, Journey Mapping, Cross-Functional Leadership, Product Strategy, Automation Strategy

Data & Analytics Databricks, SQL, PostgreSQL, Power BI, Data Architecture, Data Lineage, Semantic Models, Reporting Architecture, Operational Analytics, Data Modeling

Platform & Development GitHub, Git, Cursor, n8n, Salesforce, Oracle, Siebel CRM, Jira, Confluence, Microsoft 365, REST APIs, JSON
